

Maxine Yang

I am a recently graduated BSc (Honours) student in Computer Science with experiences in software development, artificial intelligence, and user-centred design, specialising in Human Computer Interaction. I have additionally completed a BSc with a double major in Computer Science and Psychology. I'm excited to apply my technical and interpersonal skills towards meaningful real-world projects.

EXPERIENCE

Auckland Council, Auckland, NZ

Technology Services, Product Management Intern

Nov 2025 - Present

- Working with engineering and design teams to define and refine user stories and acceptance criteria.
- Contributing to sprint planning, backlog prioritisation, and retrospectives, incorporating user feedback into each iteration.
- Conducting a product strategy research project to assess delivery efficiency, outcome achievement, and the transition from project-centric to product-centric operating models.
- Analysing workflows, stakeholder needs, decision-making strategies, and team incentives through interviews with product managers, scrum masters, and engineers.
- Synthesising findings into actionable recommendations for product teams and leadership.

Teletrac Navman, Auckland, NZ

Software Engineering Intern

Nov 2024 - Feb 2025

- Designed and developed a user-friendly, Python-based GUI application to access and filter production data from PostgreSQL databases.
- Created a script to automate Mobile Device Management (MDM) commands across field devices, improving operational efficiency.
- Monitored script output using Excel and SQL for reporting and validation.
- Retained for a further 3 weeks full-time to provide assistance and technical expertise.

MyTuition, Auckland, NZ

IB English & Mathematics Tutor

Aug 2022 - Nov 2025

- Delivered academic tutoring in IB Mathematics and English to 9 students, providing engaging lesson plans and targeted practice problems.
- Collaborated with students and families to build personalised study plans according to customer needs, focusing on long-term academic success.

SKILLS

Programming

Java, Python, R,
JavaScript/HTML/CSS,SQL

Tools & Technologies

Jupyter, Flask, React.js,
PostgreSQL, MySQL,
SQLAlchemy, MongoDB,
Figma, VSCode, Git, DevOps,
Microsoft Office Suite

Operating Systems

macOS, Ubuntu Linux,
Windows

Data Analysis

Statistical analysis, PyTorch,
pandas, numpy, matplotlib

Communication, leadership,
problem solving, adaptability,
eagerness to learn

EDUCATION

Bachelor of Science (Honours) in Computer Science

University of Auckland

November 2025

Auckland, New Zealand

- Postgraduate Faculty
Representative

PROJECTS

AI for Generative Movement, Auckland, NZ

Developer & Researcher – Honours Research Project

Mar 2025 – Nov 2025

- Investigated the use of generative AI in real-time dance and movement systems using Unity, Kinect skeletal tracking, and PyTorch.
- Extended an existing AI choreography model to support multiplayer interaction, designing data pipelines and system architecture.
- Conducted research on embodied computing and interactive movement systems, collaborating with academic researchers on system design and evaluation.
- Planned and conducted a user study with 13 participants to evaluate usability and responsiveness of multiplayer interaction designs, and iterated designs based on user feedback.

Automated Feedback for Variable Naming, Auckland, NZ

Researcher & Writer – University Course Project

Mar 2025 – Jun 2025

- Co-authored a research paper exploring the use of Large Language Models in providing code-style feedback to computer science students.
- Conducted data analysis on synthetic student code samples to assess feedback accuracy and relevance.

CampusGuessr, Auckland, NZ

UI Lead & Frontend Developer – University Course Project

Mar 2025 – Jun 2025

- Led UI/UX design and frontend development for a collaborative web application to gamify campus navigation for students; implemented core interface components and guided visual/interaction design decisions.
- Built scoring system based on speed and accuracy, and integrated user scoring with result modals and backend storage.

Parkinson's Pulse, Auckland, NZ

Team Lead, Design & Frontend – University Capstone Project, 2024

Jul 2024 – Nov 2024

- Developed a React.js web application in collaboration with Parkinson's NZ to help users track symptoms.
- Led frontend design using Figma, informed by literature reviews, user testing, and accessibility best practices.

Bachelor of Science in Computer Science and Psychology

University of Auckland

November 2024

Auckland, New Zealand

- Undergraduate Faculty Representative
- Class representative for multiple courses
- Executive committee member for Muay Thai and Brazilian Jiu Jitsu clubs

EXTRACURRICULARS

- Gig musician; drummer and songwriter for several local Auckland bands including CCTV and The New Romantix. Have played live music at various venues and recorded music for release on platforms such as Spotify.
- Martial arts practitioner; organised and participated in multiple interclub events.
- Organised and competed in multiple debate competitions and workshops in Hong Kong.
